

2DKIT
PEDESTRIAN
DETECTION

/ Pedestrian Detection Solution

SAFETY FIRST

The most complete collision avoidance range on
the market, equipped with a range of technologies

/ What is 2DKIT ?

The 2DKIT solution is equipped with collision avoidance **artificial intelligence**, allowing the detection of human shapes in 2D.

This solution can be **customised** in order to correspond to your real needs.

The 2DKIT, essential for guaranteeing the safety of your employees, **prevents damage** caused by Man-Machine collisions.

We equip numerous types of vehicles, with the option of installing up to **4 2DKIT cameras**.

/ In-cabin alerts

Detection

The detected pedestrian is highlighted by a coloured rectangle according to the detection zone.

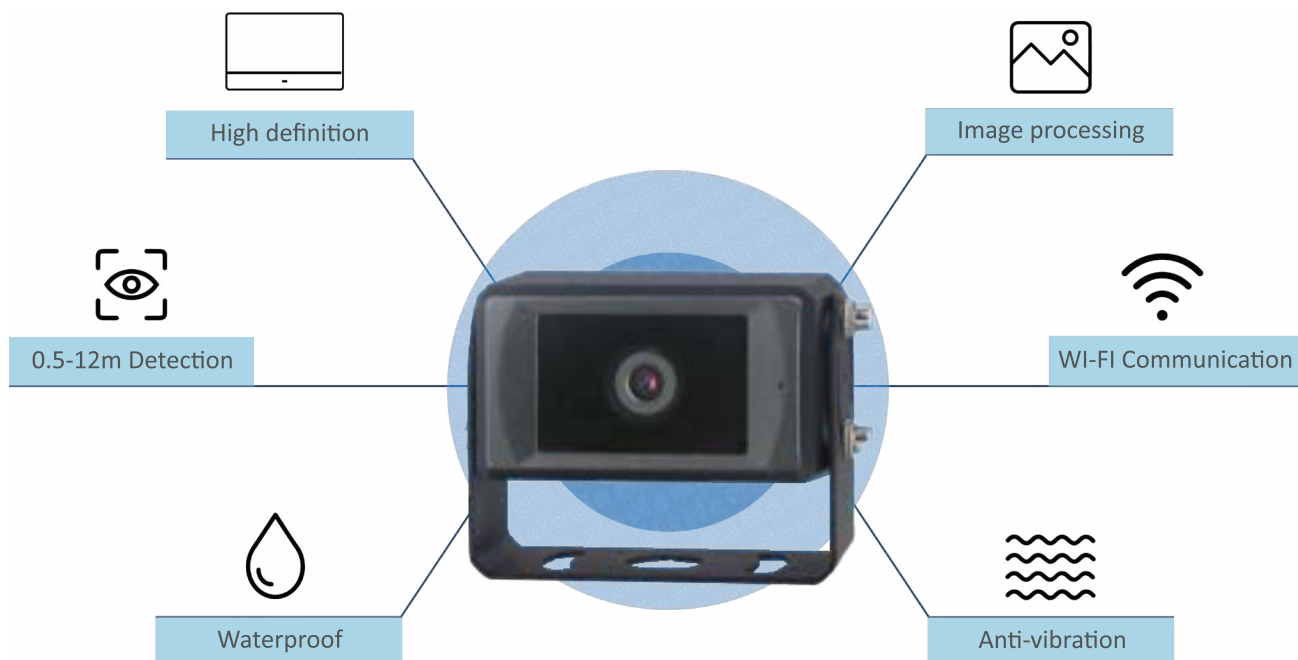

Audible alert

At the same time, there is an audible alert that changes according to the detection zone, and informs the operator of a possible dangerous situation.

Configuration

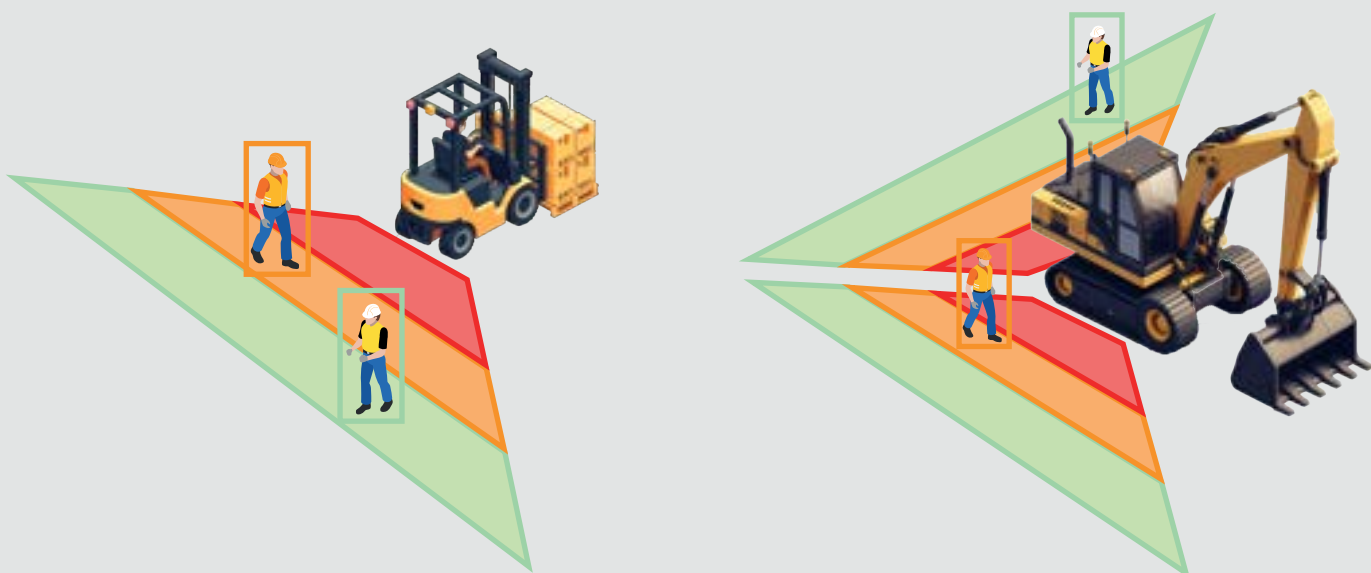

The display, the detection zones, the type of alert, the sound volume, as well as the frequency of the audible alerts can be configured by the installer.

/ Intelligent pedestrian detection

/ 2DKIT adapted to all vehicles

From one camera for the smallest equipment, to 4 cameras for your most imposing machines, our 2DKIT solution can be **adapted to all your vehicles**.

/A complete solution
