Efficiency & Safety

Efficiency and safety are at the heart of our control solutions.

For optimal control and monitoring of your mobile vehicles, we offer a **wide range of solutions, up to complete customisation**, according to your application.

Customise your control systems!

Our team will assist you in choosing and installing the most suitable solution for your application.

Complete control stations

Widest range on the market
Stations made in Germany
Tailor-made solutions

Pedals

Floor or suspended mounting
Choice of number of contacts
Choice of contact type
Protective shell

Tiller head

Configurable actuators
CAN signal available

Pushbuttons

Wide range of HMI components: push, light or emergency stop buttons
Lever switches
CAN Keypad

AUTEC Radio controls

Tailor-made solutions
Possibility of combining multi-transmitter and/or multi-receiver systems
Choice of network connectivity: CANopen, Profibus, ProfiNet,
Exclusive French Autec after sales service

Joysticks

Choice of movements: 3 axes
Different types of output signals: Digital, Analog, BUS
Multiple types of actuators and colours available: Button, Rocker, wheel, trigger, LED, mini joystick, dead man
Environment: Indoor, outdoor, Atex area
Handles: Standard, Palm handle, Ball, T-handle
